

Glioblastoma and tumor microenvironment

Giorgio Seano

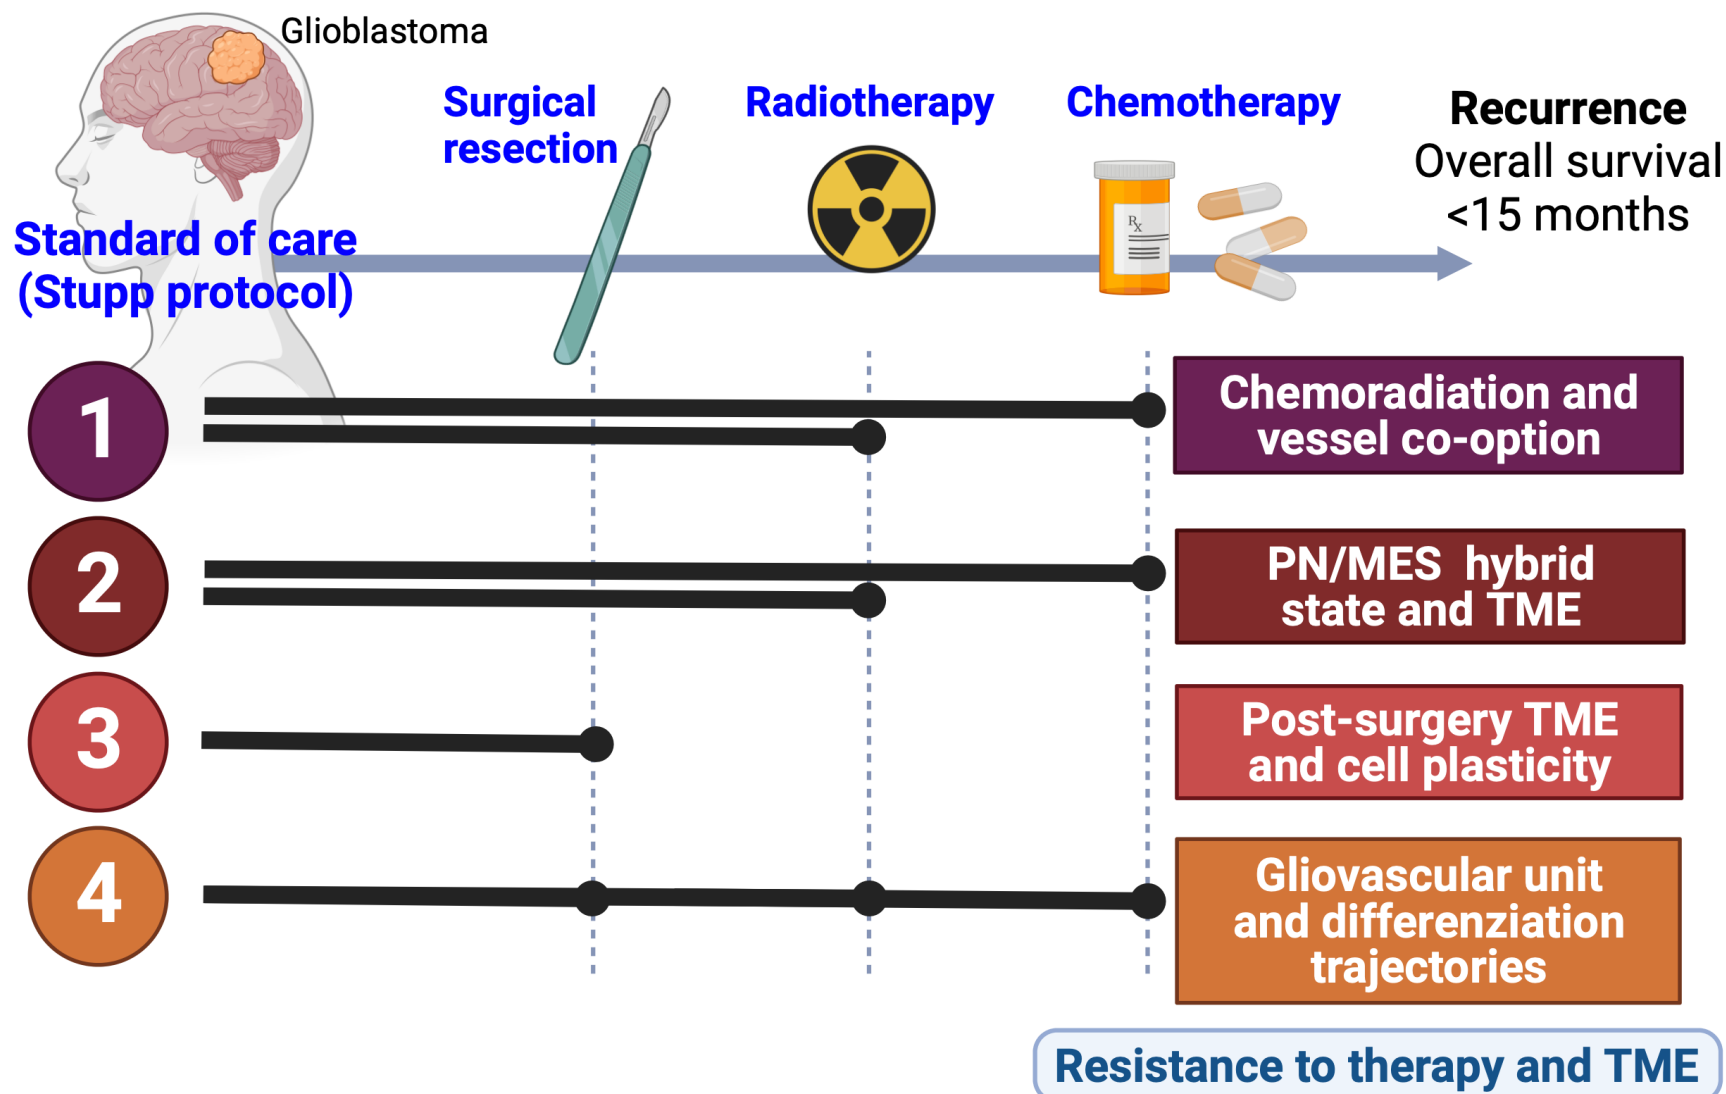

**Institut Curie Research Center, Paris
Tumor Microenvironment Laboratory**

Since 2018 - Tumor microenvironment lab at Institut Curie

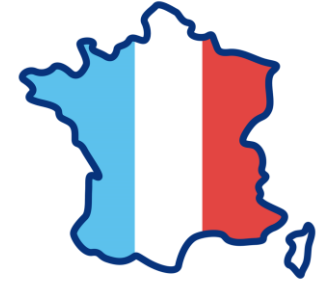

Glioblastoma and resistance mechanisms

“Am I happy to be in France and at Institut Curie?”

National level

- Funding (multiple sources)
- National social care and taxes

Employer level

- Competitive permanent position (concours) - CNRS
- No need to teach at University
- Possibility of mobility across France
- Salary

Institution level

- International environment
- Top-level facilities
- Grant office and huge help for administration
- Technology Transfer office
- Possibilities of permanent position for my mentees

“I would love to serve my country...”

- Closer to my family
- Less expensive cost of life
- Italians = great minds (high-level publications with much less money)
- There are top institutes/universities
- Possibilities of double affiliations?
- Easier networking
- Italy is really the best place in the World
